Business Intelligence & AI Leader Profile

Business Intelligence – Predictive Analytics – Strategy & Insights

Seasoned BI & AI-automation leader with 14 years of enterprise success turning fragmented data into governed, predictive insight. Expert at unifying multi-source datasets in Microsoft Fabric / OneLake, building robust semantic models, and training PySpark notebooks that forecast revenue, demand, and churn. Skilled in orchestrating Synapse Analytics and Data Factory pipelines, harmonizing ERP (SAP / NetSuite) feeds, and deploying LLM-powered workflows with OpenAI & LangChain. Proven record of mentoring cross-functional teams, tightening data governance, and elevating analytics from dashboarding to strategic decision-making.

Power BI • Microsoft Fabric / OneLake • Synapse Analytics • Data Factory • PySpark Notebooks • ERP (SAP / NetSuite) • dbt / Fivetran • Apache Airflow • n8n • GitHub Actions • OpenAI / LangChain • Pinecone • Predictive Modeling & Forecasting

PROFESSIONAL EXPERIENCE

STRAINTPRINT TECHNOLOGIES—Toronto, ON, 2025

Consultant | AI Automation Architect

Provide strategic leadership in unifying Strainprint's data, analytics, and back-office operations. Architect cloud-native platforms and AI-driven automations that eliminate silos, accelerate decision-making, and embed "second-brain" intelligence into everyday workflows. Consolidated marketing, finance, inventory, and compliance systems onto a single AWS + Power BI backbone, removing spreadsheet silos and enabling real-time, cross-department insights.

- Designed OpenAI/LangGraph agent frameworks orchestrated in n8n to route approvals, synchronize master data, and auto-notify stakeholders—cutting manual hand-offs by 40 % and shrinking cycle times from days to hours.
- Refactored legacy reports into governed Power BI semantic models with row-level security, CI/CD, and documented metadata; drove 90 % adoption of self-service dashboards across 50 + users.
- Implemented ML-based inventory forecasting that blends sell-through velocity, promotional calendars, and regional regulations—reducing stockouts and write-offs by double-digit percentages.
- Built Fabric PySpark notebooks that fused user demographics with rich session-level history—symptoms, conditions, session length, and previously used strains/dosages—to engineer features and train ML models that recommend the best strain, dosage, and ingestion method for each subscriber; results were surfaced via a Direct Lake semantic model.

MAYMONT HOMES—Charleston, SC, 2024

Manager | Data Engineering

Led a team of three in building a unified, cloud-native BI ecosystem from the ground up. Designed and maintained scalable data pipelines and ETL processes that transform raw data into actionable insights, ensuring a single source of truth. Drove the identification and recommendation of new governance and standardization platforms to enhance data integrity and reporting accuracy while optimizing dashboards to support both product usage and business performance metrics. Collaborated with cross-functional teams to align technical frameworks with strategic business goals. Directed a high-performing team to design and implement enterprise-scale analytics solutions using Microsoft Power BI, Azure Data Factory, and Apache Airflow.

- Architected and deployed comprehensive data models and automated ETL pipelines to consolidate data from diverse sources into a centralized cloud data warehouse, including OneLake, AWS RDS for SQL Server, S3 and SQL Server on EC2.
- Architected cloud-native data pipelines that support advanced analytics and robust governance frameworks, ensuring performance optimization and compliance. Pipelines included Pentaho, Azure Data Factory, Apache Airflow and/or Fivetran.
- Partnered with the data-science team to ingest 37 paid and open-source datasets, integrate them with proprietary real-estate records, and build predictive models that forecast land and home sale prices—and projected profit—over 5-, 10-, and 15-year horizons based on key market and property variables.

SENTURUS—Charleston, SC, 2023 to 2024

Practice Director | Microsoft Fabric

As the Practice Director at Senturus, I leverage Microsoft Fabric to design, develop, and deploy data analytics solutions on an enterprise scale. I spearhead the strategic direction and operational execution of enterprise solutions leveraging Fabric. My role centers around transforming complex data into actionable insights and reusable assets, such as semantic models and data pipelines, ensuring seamless integration and optimization of business intelligence capabilities.

- Spearheaded the deployment and management of all Microsoft Fabric and Power BI infrastructure implementations, integrating Power BI service administration with enterprise data modeling and performance tuning.
- **Consolidated 30+ source systems into Microsoft Fabric Lakehouse's**, standardizing schemas and incremental refresh to deliver a single governed dataset for Finance, Sales, and Ops.
- Architected and implemented comprehensive data governance frameworks for Microsoft Fabric and Power BI environments, including:
 - Established tenant-level settings and workspace roles aligned with enterprise security requirements
 - Developed and enforced naming conventions and metadata standards for datasets, reports, and workspaces

INSPIRE11—Chicago, IL, 2021 to 2023

Consultant | Data Architect

Serves as the SME for designing and implementing enterprise BI solutions using Microsoft Azure and Power BI. Identifies business requirements and develops optimal solutions to consolidate a fragmented ERP system into a unified data warehouse with Azure Data Factory, enabling centralized reporting and actionable insights for leadership. Leads the adoption of modern analytics tools, builds interactive executive dashboards, and advises on best practices for technology strategy and data architecture.

- Took the initiative to create an internal Power BI Knowledge Base which has led to faster new developer onboarding and client report creation & delivery. **A reduction from 2 weeks to 3 days.**
 - Custom downloadable external tools for Power BI Desktop
 - 20+ template designs for 10 separate industries
 - 20+ light & dark themes that can be applied to any template

BLUEPRINT DATA CONSULTING—Chicago, IL, 2018 to Present

Managing Director

Drive operations and consult **Strainprint Technologies, Ltd.** to provide the foundation developing and driving the company's analytics vision at a global level (*based in Canada and rolled out to the US & Australia and currently in the process of finalizing the Israel release*) by developing analytics, strategic marketing, conceptual and logical data models. I also oversee and advise their AWS cloud architecture to ensure company is always able to scale as they grow into these additional markets.

HELLOWORLD, INC. (A MERKLE COMPANY)—Chicago, IL, 2011 to 2018

Director of Business Intelligence, 2017 to 2018

Earned multiple promotions over the course of seven years to oversee all aspects of business intelligence with this digital marketing solutions provider. Led 8-15 member teams of data scientists, account managers and analysts, including creating best practices and standards for the organization. Built technical knowledge base and vendor relationships. Managed change to remain aligned with industry landscape and evolving data laws.

Senior Manager of Strategy & Insights, 2016 to 2017

Partnered with BI and sales teams to identify opportunities, create solutions, and present data narratives on strategic and financial facets of program performance.

Manager, Technical Lead of Client Services, 2014 to 2016

Determined and anticipated client needs to provide strategic solutions, developed project plans, defined deliverables, and created strategic roadmaps. Led team of BI developers and managed engineering and technology activities to ensure roadmaps and deliverables aligned with business objectives.

EDUCATION

INDIANA UNIVERSITY, Bloomington, IN
Bachelor of Arts and Science in European History, Minor in Communications
